Alternating printing

(option)

we're on it.

Alternating printing

(option)

Your **benefits** at a glance:

- articles can be printed differently in a print job with different decors
- a manual mixing of the different decors before packing or palletizing is not necessary

- the function of alternating printing was invented to enable identical articles to be printed with different decors
- the articles are then mixed out at the machine outlet and can then be palletized/packaged directly afterwards
- principle:

the 1st article is printed in the 1st and 4th PU

the 2nd article is printed in the 2nd and 4th PU

the 3rd article is printed in the 3rd and 4th PU

the 4th article is printed in the 1st and 4th PU

etc

Characteristics

- the software update can be done via remote maintenance access with help of a stable internet connection
- software expansion(HMI and machine software)

Optischer Bodenpasser | Einstellungen | Sonderfunktionen | **allgemein**

Zusätzlicher Modulhub für nicht erkannte/ nicht gepasserte Artikel 0 mm
